3 Iowa — Gross-Wen Technologies, Inc.

Gross-Wen Technologies uses its patent pending wastewater treatment technology, known as the revolving algal biofilm system (RAB), to cost effectively address the new nutrient standards that are being enforced at municipalities nationwide. The system uses algae to recover nutrients such as nitrogen and phosphorus from wastewater. Compared to other nutrient treatment options this system is a fraction of the cost and produces algae biomass which can be sold as a slow release algal fertilizer. Overall the process is carbon negative, making it the most sustainable approach to treat nitrogen and phosphorus from wastewater.

4 Ohio — WaterStep

WaterStep trains people in developing countries how to use safe water solutions like water chlorination, bleach making, health education, and well repair, empowering communities to take care of their own water needs for years. We believe that the best solutions to water problems are rooted in simple tools and effective training.

9 Texas — Taste Elevated

Taste Elevated, founded by Lori and Benny Krieger in 2013, is a specialty food manufacturer based in South Texas. Lori and Benny also own a specialty wine and gourmet food store. The team at Taste Elevated gained national recognition for their brand after winning multiple national specialty food awards, being recognized as a top ten Editor's pick and being featured in the Wall Street Journal. In the first four years of business, the leadership team has achieved retail distribution to some of the largest retailers in their region such as: HEB, Whole Foods, Spec's and Albertson's. The company also offers a food service line of products available to caterers, prepared food sections at grocery stores and restaurants. There are currently 24 items in their product portfolio and that is always expanding.

10 Washington — Whooshh Innovations, LLC

Whooshh Innovations™ is revolutionizing fish passage, fish handling and seafood processing through our proprietary, proven technology — moving fish cost-effectively, reliably, and gently. Whooshh Innovations was launched ten years ago, with the goal of enabling the mechanical harvest of highly perishable agricultural products such as tree fruit. Recognizing the need to apply the same technology to move fish gently over obstacles and barriers, the company pivoted to focus its core technology on live fish.

11 Wisconsin — MobCraft Beer

We are a crowdsourced brewery, each month we leverage the power of the crowd space to generate ideas for unique craft beers. Beer fans across the US submit ideas ranging from a couple flavors to tried and true homebrew recipes. The ideas go up for vote each month on our website. Votes are cast by placing a pre-order for the beer you would like to see brewed. The beer with the most pre-orders wins and is brewed, packaged and shipped straight to your door through an online retailer or available for pickup at the brewery.
