James Walter is the founder and CEO of Finagraph. Finagraph is the worldwide leader in financial software, helping every business eliminate cash flow as a reason for failing and radically streamlining the banking and lending industry with breakthrough software. Prior to founding Finagraph, James led numerous product teams Microsoft including Xbox360, Windows 7, and Windows Media. He holds multiple patents in the fields of media and technology.

His leadership experience includes executive leadership at MidStream Technologies, a startup company funded by over \$48 million, Fusion Business Finance and others.

James earned a B.S. in Computer Science from the University of Alaska. He also works with numerous Seattle-based startup incubators mentoring other CEOs.
