

Sara Hamidovic, VET Environmental Engineering

Client of the Indiana SBDC

Sara Hamidovic served as an engineer officer in the Army from 2004 to 2009, after graduating from the United States Military Academy at West Point in 2004. She did a tour in Iraq in 2005-06 with the 54th Engineer Battalion (Combat Mechanized).

Utilizing the skills that she developed in the Army, Sara established VET Environmental Engineering, LLC (VET) in 2011, as an environmental engineering and consulting firm specializing in permitting, environmental and safety compliance, wetlands and water resources, and sophisticated mapping services.

In 2018, VET proudly acquired Fields Environmental (FE), after the Indiana Small Business Development Center provided a business valuation for FE. Established in 1998, FE provides due diligence services, investigative services, and remediation/site closure services for commercial and industrial developers, lending institutions, insurance agencies, and government agencies.

VET's team is certified as a woman-owned, service disabled veteran-owned, and HUBZone small business. VET is continuing the tradition of implementing innovative, cost-effective and result-driven strategies, on a site-specific basis, to mitigate environmental issues affecting residential, commercial, and industrial properties. VET's dedicated team of environmental professionals employs time-tested experience focused on delivering effective and enduring outcomes for its clients.
