

Agile5 Technologies, Inc., a Woman-Owned Small Business (WOSB), is a systems architecture and software development firm specializing in enterprise software systems for the U.S. government. Agile5 advocates for the use of agile software development methods, which can be used with small teams of highly competent personnel to achieve the customer's vision. This philosophy is apparent in the company motto of "Proactive Planning, Agile Execution." Agile5 is the principal subcontractor that designed, developed, installed, and is maintaining the FBI Next Generation Identification (NGI), the largest biometric IT system in the Western world. With experience on more than 40 Defense, Federal, and commercial contracts totaling more than \$38 million, primarily for the Department of Defense and the Federal Bureau of Investigation, Agile5 excels at reviewing the needs of our customers and providing the most cost-effective and robust engineering solutions. Agile5 is a certified Amazon Web Services (AWS) Consulting Partner. We have certified Scrum Masters, Product Owners, and Scaled Agile Framework (SAFe®) engineers on staff, as well as Solutions Architects, Cloud Practitioners, and Administrators certified in AWS and Microsoft Azure.

Agile5 and its entire leadership team exhibits a commitment to pursuing measured growth in business while continuing to source and develop local talent to expand its team. It is noteworthy that although they hail from different parts of the state, they have come together and share a common goal: to foster economic growth within the state, region and beyond. Individually, they sacrifice their time and energy in various outreach endeavors to support the families and individuals that make up that community as well. These are just a few of the reasons that they are well deserving of recognition.
